Unsafe is Unacceptable

FOREST INDUSTRY SAFETY ALERT

Serious Incident

Location: Snass Lake

Date of Incident: 29/11/07

Details of Incident: Logging truck drive was at the bundle station

- compressor is on a elevated flat deck trailer
- set up so rope was on shorter width way on deck
- truck driver had been trained at the station
- when he pulled the cord it broke
- he fell off the side of the trailer (4 ft.) and landed on his upper back, neck and lower head

Recommended Preventative Actions: The following actions were done to prevent a reoccurrence

- the compressor was turned length ways on the flat deck trailer so if anyone should fall for any reason they would not fall off the edge
- the compressor stand was nailed down so it could not be changed
- step by step bundle wire applying instructions will be added to the logging truck driver's JSB's
