Summary: During the hot summer weather it is very important to ensure your grader’s air-conditioning unit is working. Proper functioning AC units will allow operators to comply with the WCB regulations of keeping doors shut at ALL TIMES while in operation.

Learnings and Suggestions:

- Jill pokes, branches, collisions or a machine roll-over are all hazards that can endanger operators while driving with the door open.

- **Graders are NOT permitted to operate with the door open.**

- Grader Owners and Supervisors play a part in ensuring this policy is adhered to by making sure AC units are functioning properly and window cleaner is available at all times.
