

DESCRIPTION OF EVENT

Other Trespasser and Drug Paraphernalia

Following up of a report of trespassers on the mill property, a camp/shelter was discovered as well as items that had the potential to be stolen goods. The RCMP was called and the campsite was inspected. Mill personnel were given the go-ahead to clean up the campsite by the RCMP. During the cleanup, a tent, bicycles, garbage and two used syringes were discovered.

SUGGESTED ACTIONS

- At the crew safety talk review the requirement to report all trespassers to supervisors immediately.
- Instruct all supervisors to call the police should a trespasser be discovered.
- **Do not approach trespassers.** Ensuring the safety of crew and trespasser is a priority. Stop all mobile equipment and/or machinery, as needed.
- Ensure any intervention and clean-up involves a thorough pre-work hazard assessment which includes safe handling & disposal of items found.

IMPORTANT TAKE AWAY

Campsites located on the mill sites have the potential for sharps and biological hazards. Perform a pre-work hazard that includes blood borne pathogen safe work procedures.
