Occupational Analysis Chart – BASE External Auditor

Description

A BC Forest Safety Council (BCFSC) BASE external auditor is authorized to perform and submit BCFSC audits on all sizes of companies. Auditing for BCFSC involves collecting evidence including documents, observations and interviews to ensure that a company is able to receive or maintain its SAFE and/or COR Certification. Auditing is an integral part of the SAFE Companies system.

An auditor's work environment depends on the scope of activities that the company undertakes, which may include, but is not limited to, the following:

- Manufacturing
- Harvesting
- Trucking
- Silviculture
- Fire management
- Administrative functions

BASE external auditors, compared to internal auditors, work without direct supervision. They must be able to recognize, evaluate, and control the hazards in any environment they work in. An auditor must understand and consistently apply industry-specific practices and applicable regulations and standards.

Work is primarily done outdoors, most often accompanied by company personnel, and in varied weather conditions. Generally, auditors supply their own clothing and equipment and provide auditor services for companies as a contractor.

R = Required | O = Optional
